DETAILED ACTION

This application was filed 10/03/2003 and claims priority to Provisional Application 60/416501 (10/4/2002). Claims 1-24 were canceled by paper dated 12/28/2005. Claims 25-44 are before the Examiner.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 25-38 and 40-44 are rejected under 35 U.S.C. 103(a) and being obvious over Zalukajevs (CA 48:56687, CA 62:22149, CA 59:54789, 67:53250 and CA 65:15179e-g) and Funabashi (CA 72:31075).

Zalukajevs and Funabashi both teach 4-anilino-1-benzoyl-1,2,3,4-tetrahydroquinoline that are encompassed by the instant markush of claim 25. Zalukajevs teaches N-(1-benzoyl-1,2,3,4-tetrahydro-2-methyl-4-quinolinyl)-N-phenyl-acetamide or a N-(1-benzoyl-6-(Cl or Br)-1,2,3,4-tetrahydro-2-methyl-4-quinolinyl)-N-phenyl-acetamide.

The difference between the compounds taught by Zalukajevs and Funabashi and the instantly claimed compounds is that the compounds of the prior art are hydrogen analogues of the instantly claimed compounds (because the compounds specifically disclosed by the prior art are provisoed out by the lengthy proviso of claim 25).

However, it would have been obvious to one of ordinary skill in the art to make a hydrogen analog compound of the compounds taught by Zalukajevs and Funabashi with the reasonable expectation of getting a compounds having activity against allergic diseases/conditions. Rationale: Zalukajevs and Funabashi all teach the desirability of the compounds and the ability to make a hydrogen analog of a known compound having known utility is well within the skill of the ordinary artisan.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, claim 39 is ambiguous due to the structures given in the claim are so small that the actual identity of the compound being claimed is unclear. It is suggested that the claim be amended such that the size of the structures being claimed is large enough that the bonds and atoms are clearly evident.
